

BC Service Public Net

Calling the British Columbia Public Service Net.

Good evening. Net Control tonight is _____.

My name is _____ and I am located in _____.

This is a directed net which meets daily at 01:30 UTC on 3729 kHz as a public service. All stations are welcome and should zero beat with this station. CW stations are asked to offset downwards 700 Hz to give us a clear tone. Please do not interrupt the net except for an emergency, to contact a recent check-in, to correct an error, or to provide a relay.

Give your station call sign to get my attention and if you list traffic please advise me before leaving the frequency. The use of standard phonetics saves time and is strongly encouraged.

Before beginning regular net activities are there...

1. Are there any net liaison stations from the Northern Net or EMBC?
2. Are there any official relay stations on frequency?
3. Are there any check-ins from mobile or portable stations only?
4. Are there any stations holding net bulletins?
5. Are there any stations with information on sick or injured Amateurs?

First I will take check-ins from those listing traffic or wishing to make a station-to-station call.

Traffic and roll call this evening will begin with the _____.

(begin the net)

This concludes the BC Public Service Net for this evening. My thanks to stations that handled traffic, supplied relays and to those giving us a clear operating frequency. Please tune in tomorrow evening at 01:30 UTC when _____ will be your net control station. The net is now closed at _____ hours. Thank you and 73. This is _____ out.

Sunday	North	East	Alberta	South	USA	Islands
Monday	East	Alberta	South	USA	Islands	North
Tuesday	Islands	North	East	Alberta	South	USA
Wednesday	North	East	Alberta	South	USA	Islands
Thursday	East	Alberta	South	USA	Islands	North
Friday	South	USA	Islands	North	East	Alberta
Saturday	Islands	North	East	Alberta	South	USA
