

# BC Service Public Net

---

Calling the British Columbia Public Service Net.

Good evening. Net Control tonight is \_\_\_\_\_.

My name is \_\_\_\_\_ and I am located in \_\_\_\_\_.

This is a directed net which meets daily at 01:30 UTC on 3729 kHz as a public service. All stations are welcome. CW stations are asked to offset downwards 600 Hz to give us a clear tone on LSB. Please do not interrupt the net except for an emergency, to contact a recent check-in, or to correct an error.

To save time, please check in using standard phonetics. Before beginning regular net activities...

1. Are there any liaison stations from BCEN, the Northern Net, BCYTN or EMBC?
2. Are there any official relay stations on frequency?
3. Are there any check-ins from mobile or portable stations only?
4. Are there any RAC bulletins?
5. Are there any stations holding net bulletins?
6. Are there any stations with health & welfare bulletins or reports of Silent Keys?

Roll call this evening will begin with the \_\_\_\_\_.

First I will take check-ins from those wishing to make a station-to-station call.

(begin the net)

This concludes the BC Public Service Net for this evening. My thanks to stations that supplied relays and to those giving us a clear operating frequency. Please tune in tomorrow evening at 01:30 UTC when \_\_\_\_\_ will be your net control station. The net is now closed at \_\_\_\_\_ hours. Thank you and 73. This is \_\_\_\_\_ out.

## Roll Call

---

<b>Sunday</b>	North	East	Alberta	South	USA	Islands
<b>Monday</b>	East	Alberta	South	USA	Islands	North
